

Gulfstream V

The Gulfstream V is one of the largest in Grumman Aerospace's line of business jets. It's touted as one of the best in the long range business jet categories. Delivered in 1997, the G-V has a newer, lengthened and reengineered fuselage than the G-IV along with more efficient wings and engines. The fuselage has 6 large circular passenger windows on each side. The Gulfstream V seats up to 14 passengers and is piloted by a 2 man crew. The Gulfstream V cruises at speeds up to 501 knots and has a range of approximately 6,500 nautical miles.
