

Gulfstream III

The Gulfstream III is an updated model of the Gulfstream II. It was developed in the late 1970's and first delivered in the early 1980's. Its increased the wing span and surface area allowed for larger fuel tanks, increasing its range. The G-III also has added winglets to reduce drag. It is piloted by a 2 man crew and seats up to 16 passengers. The Gulfstream III cruises at speeds up to 500 knots and has a range of 4,100 nautical miles.
