

Lear 60

The Lear 60 is the new model of the Lear 55 series. It was first delivered in 1993 and has a longer fuselage and more powerful engines. The 60 has two rear fuselage mounted engines and a swept T-tail with swept horizontal stabilizer. The fuselage has square cabin windows with 6 on the right and 5 on the left. The 60 carries up to 8 passengers and piloted by a 2 man crew. The Learjet 60 cruises at approximately 465 knots and has a range of 2675 nautical miles.
